You can use the Tools tab, located on the top menu bar, and optimize the parameters for each step. 2.2.8 Managing the hardware . VEGA ZZ offers management options for hardware. These options are exposed through the Tools tab. You can change the configuration of the optical disk drive, but this is not advisable. You can change the configuration of the adaptor USB-UART, but this is not advisable. Instead, if you want to debug any problem with the hardware, you can connect the adaptor USB-UART to a computer. For debugging, you need to replace the startup sequence with a copy of the startup sequence on the hard disk. You can copy this startup sequence to the hard disk at Step 2.2.8.1. In the Tools tab, you can select the startup sequence and change the parameters. To select the startup sequence, from the tools menu, select Startup configuration, as shown in Figure 2-12. **FIGURE 2-12** 2.2.8.1.1 Startup configuration type. VEGA ZZ has two options for startup configuration:

autoconfiguration and manual configuration. Auto-configuration is faster than manual configuration, because it is automatically generated, but in some cases the startup sequence does not work. 2.2.8.1.2 Startup sequence. There are different startup sequences. In the Manual boot sequence, you can edit the startup sequence from the Hard disk. 2.2.8.1.3 Startup sequence type. This is the main configuration option. You can use the following options: • **System Startup** You can select an option to boot to this system or to other systems. If the system is already in the system, you can select System startup. • **System Configuration** If you are not using the automatic system configuration (see Figure 2-12), you can manually configure the system configuration. • **Soft boot** You can use this option to boot to VEGA ZZ. If you select Soft boot, you will see the following screen. 2.2.8.1.4 Soft boot. • **System Startup** You can choose System startup, System configuration, or Soft boot. • **Software Setup** If you use the Hard disk, you can use the option to setup software. You can select a bootable floppy disk from the Hard disk. • **Menu Mode** In this 82157476af
